LIQUIDITY

At March 31, 2020, the Company had a cash balance of \$987,225 (June 30, 2019: \$435,294). The increase in total cash was due to the Company closed a non-brokered private placement of 4,166,667 units at a price of \$0.24 per unit for a gross proceeds of \$1,000,000. The Company has a working capital of \$391,126 as at March 31, 2020 compared to a deficit of \$229,188 as at June 30, 2019.

Net cash used in operating activities for the period ended March 31, 2020 was \$438,919 compared to \$99,962 for the period ended March 31, 2019. Increase was due to the increase in consulting and management fees and professional fees, and the decrease in payables and accruals during the period.

Net cash used in investing activities for the period ended March 31, 2020 was \$9,150 compared to of \$720 derived from investing activities for the period ended March 31, 2019. The cash was used in purchasing exploration and evaluation assets.

Net cash derived from financing activities for the period ended March 31, 2020 was \$1,000,000. It was due to the Company closed a non-brokered private placement of 4,166,667 units at a price of \$0.24 per unit for a gross proceeds of \$1,000,000. There were no financing activities reported for the period ended March 31, 2019.

The Company has no history of profitable operations and its exploration and evaluation projects are at an early stage. Therefore, the Company is subject to many risks common to comparable junior venture resource companies, including under-capitalization, cash shortages and limitations with respect to personnel, financial and other resources as well as a lack of revenues.

OPERATIONS

In fiscal 2016, the Company impaired exploration and evaluation assets for \$12,396,089 given that the fair market value of the project is valued at a nominal cost and the fact that the Company has not invested any significant expenditures on the property.

EXPLORATION

Newman Todd Project

On November 19, 2010, the Company entered into an option agreement with Redstar Gold Corp (“Redstar”) entitling the Company to earn up to 70% of Redstar’s Newman Todd gold project (the “Property”) in the Red Lake Mining District of Northern Ontario. In November 2013, the Company completed the option to earn a 50% interest in the Property by incurring over a three-year period a cumulative of \$5,000,000 of work expenditures on the Property, issuing to Redstar a total of 25,000 shares of the Company and making payments to Redstar totaling \$250,000.

As at June 30, 2016, the Company completed a preliminary economic assessment of the Property and issued 25,000 shares to Redstar in furtherance of the exercise of its option to earn an additional 20% interest in the Newman Todd Project as previously announced. The Property is subject to a 2% net smelter return and a 15% net carried interest. The latter interest does not receive payment until capital expenditures have been recovered with interest.

The Company also owns an effective 35% interest in certain other claims adjacent to the Property. At the end of 2013, the Company staked approximately 64 hectares (158 acres) of suitable ground outside of the “Area of Interest” for the purposes of land mining and infrastructure.

As at June 30, 2016 the Company had incurred \$12,396,090 in exploration and evaluation expenditures on the property. The Company decided to impair the mineral property value to \$1 given that the Company has not significantly advanced the Newman Todd Project. The Company continues to legally hold 70% interest in the property.

As at June 30, 2017, the Company voluntarily adopted a new accounting policy with respect to exploration and evaluation expenditures. Going forward, the Company will expense exploration and evaluation expenditures as incurred.
